

Screening Options

We are offering various screening options to our obstetrical patients.

If you are 35 years of age or older at the time of delivery, or have had a previous baby with a chromosome anomaly or an Open Neural Tube defect, you may choose: (please circle one)

- a. No testing at all
- b. Genetic counselling and possible amniocentesis with Perinatologist.
- c. Non Invasive prenatal testing (blood test) at 9-13 weeks

If you are less than 35 years of age at delivery and have not had a previous baby with a chromosome anomaly or open neural tube defect, you may choose (please circle one)

- a. Non Invasive Prenatal testing (blood test) at 9-13 weeks
- b. Multiple Marker Screen (AFP4) at 16-18 weeks.
- c. No testing at all
